

**Crosby's Seafood Company**  
**Current Market notes for the week of 05-20-2021**  
**Fishing Vessels (F/V) & Market Notes**

The local F/V **"Game On"** is currently tied to the dock. The dock master was not positive when they would be getting out to target more local bottom fish. He did say however that starting Saturday there is supposed to be about a 5-7 day window of beautiful weather perfect for putting some fish on the boat and that he is hoping to see them leave first thing Saturday morning to take advantage of the perfect fishing conditions.

The local F/V **"Charleston Star"** is out fishing now targeting local Swordfish and Mahi. They are currently expected back to the dock to offload by Saturday.

The local F/V **"Bonsai"** is currently tied to the dock. They have been having issues rounding up a crew to get out fishing.

The local F/V **"Seahawk"** is out fishing now targeting local Swordfish and Mahi. They are currently expected back in to offload by Saturday or Sunday.

The local F/V **"Molly D"** is getting geared up today in anticipation of getting out fishing for local bottom fish by Saturday morning. They will be expected back to the dock to offload by Wednesday or Thursday.

The local F/V **"The China Girl"** is all geared up and ready to leave the dock late this evening or first thing tomorrow morning to target local bottom fish. They will be expected in before next weekend.

The local F/V **"SeaWeed"** all geared and up and ready to leave the dock. They are waiting for the final crew member to arrive this evening and will be leaving the dock tomorrow morning to target local bottom fish. They will be expected back in by Wednesday or Thursday.

The local F/V **"Miss Jane"** is out fishing now for local Mahi and Swordfish. They are currently expected back to the dock by Monday or Tuesday.

The local F/V **"Sea Angel"** is out fishing now for local Mahi and Swordfish. They are currently expected back to the dock by Monday or Tuesday.

The local F/V **"Strictly Business"** is out fishing for local bottom fish. They are expected back in to offload either Saturday or Sunday.

The local F/V **"Oxbox"** is anticipating leaving the dock first thing tomorrow morning to target local Wreckfish. They typically fish for 7-10 days.

## Notes

- Please call in any large shellfish orders (3+ exotic oysters, mussels, or clams at a time) at least 2-3 days in advance. We Order Mondays to be received on Wednesdays; Wednesdays to be received on Fridays; Fridays to be received on Sundays. As long as your Shellfish needs are in before the purchasing day we can accommodate as much as needed.
- U-10 Buyers- Scallop production has been plentiful with the 20-30 ct. and 10-20 ct. scallops however U-10 ct. scallop production is extremely limited. Due to extreme demands and very little production, U-10 ct. market rates have jumped significantly.
- Fresh 21-25 are finally in!! Any bulk orders of 20 lbs. or more will be subject to a price reduction.
- Grouper production has begun to pick back up and we have seen slight decreases in the current market rates.
- Tuna production has been picking back up providing readily available fish and steady market rates.
- Norwegian Salmon and Faro Island Salmon have both had major issues with production driving the market rates through the roof. We have brought in Canadian salmon at much more reasonable pricing and have been very impressed with the quality thus far.
- Lobster production has been holding steady finally allowing for stable market rates. We hope that as we get into the warmer summer months that production will finally be able to catch up with demand and we will see market rates drop back down to moderate rates.,

**We are open 361 days of the year. Closed for New Year's Day, Easter, Thanksgiving, and Christmas.**

Here is a great way to stay up to date with all the latest landing percentages, openings, and closures. Although it doesn't get updates as often as it should, it will provide you with a better understanding of what species are open in our local fishery and what these Local Boats will be able to target.
